U.S. IMPORT AND EXPORT PRICE INDEXES – JUNE 2021

U.S. import prices advanced 1.0 percent in June following a 1.4-percent increase in May, the U.S. Bureau of Labor Statistics reported today. Rising prices for fuel and nonfuel imports contributed to both the June and May advances. Prices for U.S. exports increased 1.2 percent in June, after rising 2.2 percent the previous month.

Chart 1. One-month and 12-month percent changes in the Import Price Index: June 2020 – June 2021

Imports

The price index for U.S. imports advanced 1.0 percent in June, after increases of 1.4 percent in May, 0.8 percent in April, and 1.5 percent in March. Prices for overall imports rose 11.2 percent for the year ended in June. The June 12-month advance followed an 11.6-percent increase from May 2020 to May 2021, the largest over-the-year rise since September 2011. (See table 1.)

Fuel Imports: Prices for import fuel advanced 4.7 percent in June following a 5.5-percent increase the previous month. Higher prices for petroleum and natural gas contributed to both advances. The price index for import petroleum rose 4.6 percent in June, after increasing 5.4 percent in May. Natural gas prices advanced 8.1 percent in June following a 7.9-percent rise the previous month. Prices for import fuel increased 85.1 percent from June 2020 to June 2021. The price indexes for petroleum and natural gas rose 87.7 percent and 72.3 percent, respectively, over the same period.

All Imports Excluding Fuel: Nonfuel import prices rose 0.7 percent in June, after advances of 0.9 percent in May, 0.8 percent in April, and 0.9 percent in March. In June, higher prices for nonfuel industrial supplies and materials; foods, feeds, and beverages; consumer goods; and capital goods all contributed to the increase in nonfuel import prices. Prices for nonfuel imports rose 6.5 percent over the past 12 months, the largest over-the-year advance since the index increased 6.6 percent in August 2008.

Nonfuel Industrial Supplies and Materials: The price index for nonfuel industrial supplies and materials rose 1.9 percent in June following a 4.9-percent advance in May. The June increase was led by higher prices for selected building materials, chemicals, and finished metals.

Finished Goods: Prices for most of the major finished goods categories advanced in June. Consumer goods prices rose 0.4 percent, the largest 1-month increase since the index advanced 0.5 percent in February 2018. The price index for capital goods rose 0.2 percent in June and has not recorded a monthly decline since falling 0.3 percent in November 2019. Automotive vehicle prices recorded no change in June.

Foods, Feeds, and Beverages: Prices for import foods, feeds, and beverages increased 1.9 percent in June following a 0.3-percent drop in May. The June rise was led by a 9.3-percent advance in meat prices.

r Revised

Chart 2. One-month and 12-month percent changes in the Export Price Index: June 2020 – June 2021

Exports

U.S. export prices increased 1.2 percent in June, after rising 6.0 percent from February to May. The price index for U.S. exports has not recorded a monthly decline since a 3.5-percent drop in April 2020. In June, higher prices for both agricultural and nonagricultural exports contributed to the overall advance in export prices. Prices for U.S. exports increased 16.8 percent from June 2020 to June 2021. The over-the-year advance in June followed a 17.5-percent rise for the year ended in May, which was the largest 12-month increase since the overall export price series was first published in September 1983. (See table 2.)

Agricultural Exports: Prices for agricultural exports advanced 1.5 percent in June following a 6.1-percent rise the previous month. Agricultural export prices have not recorded a monthly decline since a 2.2-percent decrease in August 2020. In June, a 10.6-percent advance in meat prices more than offset lower prices for corn, wheat, and soybeans. Prices for agricultural exports increased 33.5 percent over the past 12 months, primarily driven by higher soybean and corn prices.

All Exports Excluding Agriculture: The price index for nonagricultural exports advanced 1.1 percent in June, after rising 1.8 percent in May and 1.2 percent in April. In June, higher prices for nonagricultural industrial supplies and materials; capital goods; consumer goods; automotive vehicles; and nonagricultural foods all contributed to the increase in nonagricultural export prices. Prices for nonagricultural exports advanced 15.0 percent over the past year.

Nonagricultural Industrial Supplies and Materials: Nonagricultural industrial supplies and materials prices increased 2.1 percent in June following a 4.3-percent rise the previous month. Both increases were primarily driven by higher fuel prices, which advanced 4.5 percent in June and 6.1 percent in May. The price index for nonagricultural industrial supplies and materials rose 41.7 percent for the year ended in June.

Finished Goods: Prices for each of the major finished goods categories increased in June. The price index for export capital goods advanced 0.4 percent for the month and increased 1.7 percent over the past year. The 12-month rise was the largest over-the-year advance since the index increased 1.9 percent for the year ended September 2018. Export consumer goods prices rose 1.0 percent in June, the largest monthly advance since a 1.2-percent increase in June 2011. Prices for automotive vehicles rose 0.1 percent in June, after declining 0.3 percent in May.

Measures of Import and Export Prices by Locality

Imports by Locality of Origin: Import prices from China rose 0.4 percent for the sixth time in the past 7 months in June. The price index for imports from China advanced 3.1 percent over the past year, the largest 12-month increase since the index rose 3.3 percent for the year ended February 2012. Prices for imports from Japan declined 0.2 percent in June, after 0.3-percent and 0.5-percent increases in May and April, respectively. The June decrease was the first 1-month drop since the index edged down 0.1 percent in July 2020. Despite the decrease, import prices from Japan rose 1.8 percent from June 2020 to June 2021. The price index for imports from Canada advanced 3.1 percent in June following a 5.1-percent increase the previous month. Prices for imports from Mexico and the European Union also rose in June, advancing 0.5 percent and 0.1 percent, respectively. (See table 7.)

Exports by Locality of Destination: Prices for exports to China rose 0.7 percent in June, after advancing 1.7 percent in May. The price index for exports to China has not recorded a monthly decline since the index fell 1.2 percent in September 2020. Prices for exports to China rose 14.3 percent over the past year. Export prices to Japan advanced 1.2 percent in June following a 3.2-percent rise the previous month. Prices for exports to Japan increased 15.8 percent for the year ended in June. Export prices to Canada rose 0.9 percent in June, after a 1.3-percent increase in May and 1.4-percent advances in April and March. Prices for exports to Canada advanced over the past 12 months, rising 14.9 percent. Export prices to Mexico increased 1.3 percent in June and export prices to the European Union rose 1.1 percent. (See table 8.)

Terms of Trade Indexes: Terms of trade indexes are based on country, region, or grouping and measure the change in the purchasing power of exports relative to imports. U.S. terms of trade with China advanced 0.3 percent in June following a 1.3-percent rise the previous month. The index for U.S. terms of trade with China increased 11.0 percent over the past year. U.S. terms of trade with Japan advanced 1.4 percent in June, after a 2.9-percent rise in May. In June, both higher export prices to Japan and lower import prices from Japan contributed to the increase. The index for U.S. terms of trade with the European Union advanced 1.0 percent in June, the largest monthly rise for the index since a 1.3-percent increase in June 2020. U.S. terms of trade with Mexico also advanced in June, increasing 0.8 percent following a 7.4-percent advance the previous month. In contrast, the index for U.S. terms of trade with Canada declined 2.3 percent in June, after a 3.5-percent drop in May. U.S. terms of trade with Canada decreased 18.9 percent from June 2020 to June 2021. (See table 9.)

Import and Export Services

Imports: Import air passenger fares advanced 9.6 percent in June, after increasing 5.0 percent the previous month. The June rise was the largest advance since September 2018 and was driven by higher European and Asian fares. Import air passenger fares rose 16.3 percent for the year ended in June, the largest over-the-year advance since the index increased 16.7 percent from September 2009 to September 2010. Prices for import air freight rose 2.8 percent in June following a 5.4-percent increase in May and a 7.5-percent advance in April. Import air freight prices rose 12.8 percent over the past year. (See table 10.)

Exports: The index for export air passenger fares rose 7.8 percent in June, after declining 1.8 percent the previous month. The June increase was the largest monthly advance since January 2021 and was led by higher Latin American/Caribbean, Asian, and European fares. Export air passenger fares increased 26.9 percent for the year ended in June. In contrast, export air freight prices decreased 0.5 percent in June and 2.2 percent over the past 12 months.

U.S. Import and Export Price Index data for July are scheduled for release on Friday, August 13, 2021 at 8:30 a.m. (ET).

TECHNICAL NOTE

Import and Export Goods and Services Price Indexes - All indexes use a modified Laspeyres formula and are not seasonally adjusted. Price indexes are reweighted annually, with a 2-year lag in the weights. Published series use a base year of 2000=100 where possible. More detailed index series and additional information may be obtained at www.bls.gov/mxp or by calling (202) 691-7101.

Merchandise Goods Classification Systems - The merchandise price indexes are published using three classification systems. Items are classified by end use according to the Bureau of Economic Analysis Classification System, by industry according to the North American Industry Classification System (NAICS), and by product category according to the Harmonized System (HS). While classification by end use and product category are self-explanatory, some notes are in order for classifying items by industry. In the NAICS imports and exports tables, items are classified by output industry, not input industry. As an example, NAICS import index 326 (plastics and rubber products manufacturing) includes outputs such as manufactured plastic rather than inputs such as petroleum. The NAICS classification structure also matches the classification system used by the Producer Price Index (PPI) to produce the NAICS primary products indexes.

Import Price Goods Indexes - Items are classified by the Harmonized Tariff Schedule of the United States Annotated (TSUSA). Import prices are based on U.S. dollar prices paid by the U.S. importer. The prices are generally either "free on board" (f.o.b.) foreign port or "cost, insurance, and freight" (c.i.f.) U.S. port transaction prices, depending on the practices of the individual industry. The index for crude petroleum is calculated from data collected by the U.S. Department of Energy.

Export Price Goods Indexes - Items are classified by the Harmonized Schedule B classification system of the U.S. Bureau of the Census. The prices used are generally either "free alongside ship" (f.a.s.) factory or "free on board" (f.o.b.) transaction prices, depending on the practices of the individual industry. Prices used in the grain index, excluding rice, are obtained from the U.S. Department of Agriculture.

Services Price Indexes - Indexes for import and export air passenger fares calculate changes in the average revenue received per passenger by foreign carriers from U.S. residents and by U.S. carriers from foreign residents, respectively. Data are obtained from an airline consulting service and report on tickets sold by travel agencies, travel websites, and directly by the airlines. Taxes and fees are included in both the import and export air passenger fares indexes. Import air passenger fares data have used the airline consulting service source since September 2008. Before April 2018, the export air passenger fares data were collected directly by BLS from U.S. airlines. The air freight indexes are calculated from data collected directly from airlines. These data exclude mail and passenger baggage. The scope of the service being priced is the movement of freight from airport to airport only, and does not include any ground transportation or port service. The air freight indexes are presented using two definitions: balance of payments (which represents transactions between U.S. and foreign residents) and international (which represents transactions inbound to and outbound from the United States.) Fact sheets specifying detailed information for each services industry are available at www.bls.gov/mxp under "MXP Publications."

Import Price Indexes by Locality of Origin - Prices used in these indexes are a subset of the data collected for the import price indexes. The indexes are specific to a country, region, or grouping and, beginning with January 2002, are based on the North American Industry Classification System (NAICS) covering goods-producing industries. Nonmanufactured goods are defined as NAICS 11 and 21, and manufactured goods are defined as NAICS 31-33.

Export Price Indexes by Locality of Destination - Prices used in these indexes are a subset of the data collected for the export price indexes. The indexes are specific to a country, region, or grouping and are based on the North American Industry Classification System (NAICS) covering goods-producing industries. Nonmanufactured goods are defined as NAICS 11 and 21, and manufactured goods are defined as NAICS 31-33.

Terms of Trade Indexes - Terms of trade indexes measure the relative price of exports in terms of import prices for a specific country, region, or grouping. The indexes are calculated as one country, region, or grouping's all-export goods price index divided by the corresponding all-import goods price index on a scale of 100.

Relative Importance - A relative importance is a specific index's price-updated value share (expressed as a percentage) of overall imports or exports at a specific point in time. Relative importance values are affected by the trade weights at the point indexes are reweighted and index changes relative to other indexes since the reweight point. If an index is rising in value relative to other indexes over time, the relative importance will increase as well.

Revision Policy - To reflect the availability of late reports and corrections by respondents, monthly data may be revised in each of the 3 months after original publication. After 3 months, no further data revisions take place. For example, data first published in the January release will be subject to revision in the releases for February, March, and April.

Rounding Policy - Index values are rounded to the tenth decimal place after being calculated. All percent changes are then derived from the rounded index values and subsequently rounded to the tenth decimal place.

Uses of the Data - The primary use of the indexes is to deflate trade statistics, notably the foreign trade sector of the National Income and Product Accounts (NIPA) constructed by the Department of Commerce. Other published indexes are useful for general market analysis. For trade in international services, balance of payments indexes are used for deflating NIPA, while international indexes are more appropriate for market analysis.

Email Subscription - The U.S. import and export price indexes news release is available through an email subscription service at www.bls.gov/bls/list.htm.

Additional Information - More detailed data are available on the Import/Export Price Indexes home page at www.bls.gov/mxp. For import and export price indexes data requests, send an email to mxpinfo@bls.gov.

Information from this release will be made available to sensory impaired individuals upon request. Voice phone: (202)-691-5200; Federal Relay Service: 1-(800)-877-8339.
